When it comes to ensuring the success of a client implementation of Kentico, user adoption is paramount. This two day instructor led course introduces client content administrators to Kentico CMS. The training will instruct on how to use Kentico CMS 5 to author and publish content and will ensure CMS users learn how to perform their typical day-to-day tasks around managing content, security, workflow and advanced editorial tasks in the delivery of dynamic content to a Web site. Additionally, it focuses on the introductory fundamentals and best practices for using Kentico CMS.

## Target Audience

This course is intended for content editors and website administrators with little or no previous experience using CMS software and individuals that that are beginning to work with Kentico CMS 5 and wants to learn the core capabilities and essential skills. Attendees are expected to have basic computer skills, including the use of Internet Explorer and standard word processing tools such as Microsoft Word. Attendees are not assumed to have programming experience, nor will the training contain any programming related tasks.

## Goals

After successfully completing this course, trainees will be fully equipped to use Kentico CMS for basic and advanced content authoring tasks.
