

Getting Started Package

Overview

Kentico Getting Started is a 3-day consulting package that reviews the implementation requirements and system architecture to ensure business and architecture validity and compliance with Kentico standards.

Kentico Getting Started package will help you avoid costly mistakes in your architecture or project plan and ensures you use Kentico CMS in the most efficient way without reinventing the wheel.

Kentico Getting Started package can be delivered either as in-depth training on the most important areas of Kentico CMS, with emphasis on environment setup and configuration or architecture and solution design, the most common development tasks and deployment actions. Please review the topic guide [here](#).

Deliverables

This on-site or virtual consulting engagement reviews the business and technology requirements of your project and provides best practices recommendations and guidance on Kentico CMS/EMS system architecture and implementation.

Schedule Your Getting Started engagement now and ensure the Success of Your Project!
