FOR IMMEDIATE RELEASE

First Batch of Developers Achieve the Kentico CMS Developer Certification

Nashua, New Hampshire, USA, June 30, 2010 – Kentico Software (http://www.kentico.com), the Web content management system vendor, announced the first five Kentico Certified Developers.

Achieving the Kentico Developer Certification demonstrates a .NET developers experience and technical problem-solving skills, allowing them to be recognized as Kentico CMS experts.

"The exam is designed to test a developer's skills and knowledge on Kentico CMS technology, making their employers and clients sure that they can properly leverage the functionality and capabilities of Kentico CMS," says Thomas Robbins, at Kentico Software.

The first five Kentico Certified Developers are:

- Scott Morschhauser from Sedona Technologies
- Bryan Soltis from Bit-Wizards Custom Software Solutions
- Jeroen Fürst from IBL-Software BV
- Richard Pendergast from Not At All Strange
- Jonathan Hopper from Alchemy Group Limited

"I was very excited to read about the Kentico Certified Developer Exam on Kentico's DevNet and registered myself immediately. The exam and its certification convinced me that I possess the knowledge needed to develop using Kentico and I hope that the certification will contribute to the Kentico developers community," says Jeroen Fürst, Lead Kentico Developer at IBL-Software BV.

"The Kentico Developer Certification shows our customers that we are committed to Kentico as our recommended CMS platform and have the expertise to meet their varied Kentico development needs," says Scott Morschhauser, Software Developer at Sedona Technologies.

"The certification was well worth the effort—comprehensive and surprisingly difficult. After sitting through the exam myself and discovering the depth and range of the questions, I'll not only be looking at certifying all of my staff, but will also be aiming to hire certified developers in the future," says Richard Pendergast, Director at Not At All Strange.

"The certification gained from the Kentico Certified Developer Exam assures my clients that they are receiving the superior expertise necessary to set up, configure, modify, and extend the Kentico CMS System to the fullest of its capabilities in a format best suited for their business needs," says Bryan Soltis, Senior Software Engineer at Bit-Wizards Custom Software Solutions.

"Becoming a Kentico Certified Developer has given our business the confidence that it is delivering the best possible solutions to its clients" says Jonathan Hopper, Senior Software Engineer at Alchemy Group.

More information about the Kentico Certified Developer Exam is available at: http://www.kentico.com/Training/Certification.aspx

About Kentico CMS
