FOR IMMEDIATE RELEASE

**Kentico Partners with Bit-Wizards to Deliver the Kentico Mobile Manager for Windows 8**

**Nashua, New Hampshire, USA, October 18, 2012 – Kentico Software ([www.kentico.com](http://www.kentico.com)), the Web Content and Customer Experience Management vendor, announces the immediate availability of the Windows Mobile Manager for Kentico CMS in the Microsoft Windows Store developed and built by Bit-Wizards, a Kentico CMS and Microsoft Gold partner.**

“Kentico CMS Gold Partner, Bit-Wizards, has developed the professional and visually appealing Kentico Manager linking the Windows 8 to Kentico CMS. This highlights the growth of the mobile market and showcases the expertise that sets Bit-Wizards apart,” said Petr Palas, CEO and Founder of Kentico Software. “Bit-Wizards make it their duty to invest in up-to-the-minute solutions compatible with and leveraging the power of Microsoft’s latest products and the release of the Kentico Manager for Windows 8 app is no exception.”

The app leverages functionality from the Mobile Manager Windows Phone app by allowing Kentico website administrators to manage multiple Kentico websites remotely. It allows them to perform useful tasks like starting and stopping sites, clearing site cache and memory, and monitoring the health of their websites (by viewing the installation event log), all through a Windows 8 desktop app.

“Since 2004, the Bit-Wizards and Kentico partnership has been at the forefront of technology for early adopters. Recognizing the significant opportunity for consumers and enterprises that Microsoft’s new touch-based operating system represents, Bit-Wizards is thrilled to launch its first Windows Phone App in the Microsoft Windows Store,” said Vince Mayfield, CEO of Bit-Wizards. “The release of Kentico Manager for Windows 8, which allows users to perform basic site functions via a Window Phone, puts Bit-Wizards ahead in the mobile device revolution sweeping the world today.”
