

Kentico

XTM Integration.

Integrate Kentico with XTM, a simple, scalable, and robust translation management system (TMS).

Localize content into any number of target languages

Track translation progress in real time

Save time with automated workflows

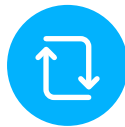

Cut costs by fully leveraging your language assets

Benefits of XTM Connect for Kentico Xperience 13

Create and use templates to start new projects in seconds

Automatically receive target content once localized

Translate multimedia files, such as webpages with images, and send/receive everything through XTM Cloud.

Manage all translations within the Kentico interface, without needing to learn a new tool

Virtually merge source files in XTM, enabling PMs and linguists to work from a single file.

Main Features

- Automated transfer of content from Kentico Xperience 13 to XTM Cloud.
- Swift creation of projects with templates tailored to user needs.
- Automated delivery of finished work back to Kentico Xperience 13.
- Creation of high-quality content with access to Translation Memory and Terminology.
