FOR IMMEDIATE RELEASE
February 26, 2008

Brno, Czech Republic, February 26, 2008 – Kentico Software has just announced that the new version 3.1 of their Web Content Management System will support Microsoft Windows Server 2008 and SQL Server 2008.

Kentico Software will release a new version 3.1 of their Web Content Management System Kentico CMS for ASP.NET in the middle of March 2008. The new version will work with Microsoft Windows Server 2008 and Microsoft SQL Server 2008 that will be launched on February 27.

This news comes soon after the company announced their CMS supports Microsoft Visual Studio 2008 and Microsoft IIS 7.0 at the beginning of February. Kentico CMS will keep the support for Windows Server 2000/2003 and SQL Server 2000/2005 as well.

"We are happy to announce that our products will be ready for the new versions of the Microsoft server family soon. It will allow Kentico CMS users to run their web sites on the most powerful and most secure platform Microsoft has ever released," says Petr Palas, founder and CEO of Kentico Software.

About Kentico CMS
